BOOST YOUR PROFITABILITY

What if an expert could advise you to become more profitable?

It's hard to optimise your shop's performance if you don't know where you are standing. You know how your business works, but the daily work takes all your attention and prevents you from seeing where you could get better results. That's why as part of our **PPG COLLISION SERVICES®** package we want you to benefit from **BENCHMARK REPORT**.

This tool analyses your business's key performance indicators, compares them with the average data in our database and draws up a personal, made-to-measure action plan, with the sole purpose of improving your business's overall return.

BENCHMARK REPORT will show your business's current status in financial and throughput terms, will identify the areas that need to be improved and will set improvement priorities. Finally, our tool will help you make the right decisions to achieve the goals you are pursuing.

Don't forget to review and assess the measures taken; there's no success without ongoing progress monitoring. Find out how your business is doing. More than 3,000 bodyshops throughout the world have already done it and they now rely on **BENCHMARK REPORT** and our consultants to improve their profitability year after year.
